U.S. DOT Publishes New Emergency Response Guidebook for 2016

On 27 April 2016, the U.S. Department of Transportation's (DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA) released the 2016 Emergency Response Guidebook (ERG 2016). While the guidebook is aimed at first responders, the chemical industry can use the data in ERG 2016 for their environment, health and safety practices, especially in relation to the transportation of hazardous materials and the disclosure of emergency response information on safety data sheets.
