

## News and expert analysis on the new and emerging regulations that impact your business

With constantly changing regulations, an array of regulatory authorities, multiple jurisdictions worldwide, and an ever expanding variety of news sources, keeping abreast of regulatory and industry developments and understanding their impact on your business is a formidable challenge. How do you keep up with all of the regulatory announcements and industry trends affecting your organization's products, suppliers and markets? More importantly, are you able to quickly analyze their implications? Regulatory Monitoring from 3E can help.

3E's Regulatory Monitoring solution provides a single source for regulatory news plus expert analysis, tailored to the topics that matter to your business and delivered in the format and frequency that fit your needs. Regulatory Monitoring cuts through the clutter of regulatory, industry and commodity news, going beyond simple content aggregation to provide both context and insight.

You'll have the tools needed to do more than simply comply with new and emerging regulations. With Regulatory Monitoring you'll be able to develop and execute a proactive strategy for intelligent compliance, leveraging relevant content and expert analysis to make better business decisions, increase quality and reduce risk across your organization and supply chain.

### Global News Coverage

3E utilizes in house Environmental Health and Safety (EH&S) expertise and an extensive network of global contacts to actively monitor new and emerging regulatory and industry developments for a broad range of pertinent topics in more than 100 countries. Regulatory Monitoring gives you access to key regulatory, commodity and industry news including:

- Chemicals and Materials covering topics such as Banned and Restricted Substances, GHS, Conflict Minerals, New Chemical Notifications, REACH, ROHS and more
- Food and Beverage topics such as Food Additive and Flavor Regulations, Supplements, Vitamins, GMOs, Nutritional and Health Claims, Product Standards for Food Ingredients, Banned and Restricted Substances, Labeling and more
- Industry and commodity specific news for Cosmetics, Automotive, Electronics, Paint and Children's Products

### Relevant News and Insightful Analysis

3E's regulatory experts review each news item and compile a summary, detailed description, analysis and links to source materials to help you quickly determine the potential impact of new regulatory developments. The solution monitors both current and proposed regulatory changes and filters the news according to your preferences.

### WHAT REGULATORY MONITORING CAN DO FOR YOUR ORGANIZATION

#### Cut Through the Clutter

EH&S professionals are required to track hundreds of continually changing regulations in many jurisdictions as they apply to thousands of commodities and substances. There are multiple news feeds available, but many are either specific to one area or regulation or are so broad that it is time consuming and difficult to sort through the information to find what is relevant to your business. Other feeds provide just news or legal text without a plain language description or insight into what the impact may be on businesses.

Rather than simply aggregating content or delivering more news feeds to wade through, Regulatory Monitoring offers subscribers a single online source for relevant news and expert analysis covering topics from multiple sources and geographic areas. You can access the searchable archive of news articles or subscribe to receive customizable notifications when news is published. Each article contains a thorough review and analysis from 3E's team of regulatory experts.

#### Personalize Your Subscription and Delivery

Regulatory Monitoring makes it easy to search the growing archive of news articles. You can browse by title, publication date, jurisdiction, governing body, active or prospective status, or topic area. You can also subscribe to receive email notifications when new articles are published that meet your customized criteria, including specific Chemical Abstracts Service (CAS) number, commodity codes, geographies or industries, offering instant access to news that matters to you and your business.

#### Apply Valuable Insight

3E's in house team of regulatory experts includes attorneys, chemists, food scientists and EH&S professionals with the experience, contacts and language skills needed to anticipate, track and

analyze developing requirements around the globe. The team has established well-defined processes to monitor, research and maintain global regulatory and compliance related content.

With the Regulatory Monitoring solution 3E experts provide real world analysis to make news on global regulatory developments understandable and meaningful to subscribers. Each news article contains 3E's regulatory expert analysis and insight, enabling companies to quickly understand the legal requirements and determine the potential impact of regulatory changes.

### Get Out Ahead of Changes

Regulatory Monitoring enables subscribers to stay informed of both current and emerging developments. Having access to insightful analysis of regulatory changes and trends provides powerful decision support and facilitates a more proactive approach

to compliance obligations as well as product development. Subscribers can get out in front of changes, improving their ability to analyze implications, engage with their supply chain partners, modify products or work with industry groups to influence proposed regulations before they go into force.

### Integrate Seamlessly

Regulatory Monitoring can be accessed via 3EiQ™, a user-friendly portal that allows subscribers to navigate seamlessly between 3E solutions including 3E Online®, 3ESC® Supply Chain Solutions, Ariel® WebInsight, ArielLogic, Ariel Integrated Content, MSDgen® and Authoring on Request.

Regulatory Monitoring can also be integrated with other 3E solutions, increasing efficiency by allowing subscribers to quickly assess suppliers, raw materials, or products that may be impacted by regulatory and industry developments.

Regulatory Monitoring provides regulatory news plus expert analysis, tailored to the topics that matter to your business and delivered in the format and frequency that fit your needs.
