

Tackle your compliance challenges with industry leading regulatory expertise

Does your organization have the dedicated resources and expertise to anticipate, analyze and fulfill increasingly complex compliance obligations? Can you ensure your products and facilities are safe, sustainable and compliant? Are you able to manage the nuances of changing regulations by substance, by product and by market on a global basis? Does your team include regulatory experts with direct experience addressing your particular compliance requirements?

With 3E Regulatory Consulting Services from Verisk 3E™, the answer is yes. Our team of highly qualified regulatory analysts, chemists, toxicologists, Environmental Health and Safety (EHS) specialists and other compliance experts will work closely with you to identify and analyze your organization's specific compliance obligations. We will provide actionable regulatory guidance and architect practical, effective solutions to even your most complex product and facility stewardship and regulatory compliance challenges.

At Verisk 3E we have 30 years of proven experience helping customers worldwide navigate the intricacies of local, national and international regulatory frameworks throughout the entire product lifecycle, from R&D to recycle or disposal. We are uniquely qualified to develop and execute customized consulting programs that empower our customers to achieve business goals, reduce operational risk, increase compliance and drive innovation.

Chances are we have already done what you need to do and we have the knowledge, experience, contacts, content and insight to help you succeed.

What 3E Regulatory Consulting Can Do For Your Organization

CREATE INTELLIGENT COMPLIANCE SOLUTIONS TAILORED TO YOUR NEEDS

Whether your organization needs short term project assistance, ongoing services or a long term engagement, the Verisk 3E Regulatory Consulting Services team can create and execute intelligent compliance strategies to meet your specific business needs and regulatory requirements.

We offer many standard service offerings that harness the power of our expertise including Product Compliance; Global Chemicals Registration, Notification, and Reporting; Toxic Substances Control Act (TSCA) Compliance; Safer Chemical Analytics and Facility EHS Services. We also support a wide array of custom projects.

ACCESS VALUABLE INSIGHT

Verisk 3E's core competence lies in researching, obtaining, aggregating, validating and enriching compliance related data and making it actionable and available to our customers. We have learned from decades of experience that regulatory research and data obtainment requires both the science of technology and art of the human touch. Our industry leading knowledge base is the broadest, most dynamically updated, highest quality and most accurate collection available.

LEVERAGE A GLOBAL TEAM OF EXPERTS

Verisk 3E fields a multi-disciplinary, multilingual team of highly trained regulatory, scientific and technical professionals with global exposure and experience. Our Regulatory Consulting Services staff can serve as an extension of your own team, decreasing the burden on internal resources, reducing the workload of compliance personnel and bridging gaps in regulatory knowledge.

Our roster of resourceful problem solvers includes:

- Chemists
- Toxicologists
- Attorneys
- Regulatory Analysts
- Safety Data Sheet (SDS) Authors
- Business Consultants
- Technical Writers and Editors
- Food Scientists
- Dangerous Goods Specialists
- EHS Professionals

We continue to evolve to better serve our customers.

APPLY UNMATCHED EXPERIENCE AND EXPERTISE

Our professionals possess deep domain expertise. Many are recognized as thought leaders, as evidenced by our industry awards, speaking engagements and published articles. We draw upon their extensive knowledge and capabilities to develop customized strategies for intelligent compliance that address the regulatory obligations of specific industries.

Our regulatory experts:

- Maintain direct relationships with regulatory bodies around the globe
- Leverage experience gained in a variety of disciplines such as environmental health, sciences, and engineering; natural resources; toxicology; product safety and stewardship; chemical engineering; business process engineering; dangerous goods logistics; hazardous materials management; emergency response; chemistry; law and others
- Possess an array of industry expertise including chemical, process, consumer product and pharmaceutical manufacturing; food and beverage; waste management; emergency response; environmental consulting; healthcare; retail and others
- Hold relevant academic degrees and certifications
- Speak dozens of languages and possess the ability to read regulations in the language in which they are authored as well as understand local interpretations and applications
- Are accessible to our customers, working and residing in several time zones

OVERCOME BARRIERS TO COMPLIANCE

Companies in highly regulated industries operating within a global marketplace face an increasing array of challenges. Our team can help you overcome issues such as:

- Language barriers
- Differing obligations by market
- In-country representation
- Interfacing with competent authorities
- Keeping abreast of regulatory changes
- Internal business resource shortages
- Interpreting and applying regulations
- Access to current materials
- Determining the impact of regulations on products, suppliers and markets

Achieve End-To-End Regulatory Compliance

Verisk 3E is the partner you can trust to help navigate the complexities of global product, facility and supply chain stewardship and compliance. We work strategically with you to identify and assess your risks, understand your responsibilities, establish your compliance objectives and deliver the services and solutions to achieve them.

Verisk 3E offers a unique combination of services and tools that draw on the specialized compliance experience of our staff as well as the power of our award winning solution suite.

Verisk 3E products include:

- 3E Protect™ for Safety Data Sheet (SDS) and chemical management
- 3E Connect™ for supply chain stewardship
- 3E Insight™ for Chemicals for chemical and cosmetics regulatory research
- 3E Insight™ for Food for food and flavors compliance
- 3E Optimize™ content for systems integrated data, rules, phrases and templates
- 3E Generate™ for SDS and label authoring as well as outsourced SDS authoring services
- 3E Monitor™ for news and analysis on both new and proposed regulations

Our core Regulatory Consulting Services offerings include:

PRODUCT COMPLIANCE

Verisk 3E offers a full spectrum of expert services that address the challenges of bringing a product to market and managing compliance from a global perspective, from the inception of a new chemical or substance through product commercialization, supply chain distribution and disposal and reuse. By utilizing our product compliance consulting services, clients can mitigate risk, decrease time to market, make better business decisions and improve sustainability.

Our regulatory team possesses deep knowledge of the fast paced, constantly evolving regulatory landscape. We can pinpoint the local, regional, national and global regulations and regulatory projections for a substance or product, provide an up-to-date status of the current requirements by market, offer insight on the potential effects of upcoming changes in the regulations and enable customers to build compliance into the product development process.

Look to 3E Regulatory Consulting services for a range of product compliance solutions including:

- Global hazard communication authoring and review
- Product compliance certification (including banned and restricted substances)
- Consumer and industrial products labeling and packaging
- Global chemical management review
- Classification
- Disclosures
- Formulation review
- Manufacturing EHS program development
- Waste classification and management
- Transportation compliance
- California Proposition 65 compliance

California Proposition 65 Compliance

We will leverage our industry leading content, regulatory knowledge and solutions to develop and execute a compliance program tailored to your requirements.

Our Prop 65 experts can:

- Assess your required label warnings, exemptions and options for compliance
- Author and/or update your product SDS and label documents to include Prop 65 warning statements
- Compare ingredients for raw materials and products against the Prop 65 substance list
- Monitor the Prop 65 list and assess the impact of new and proposed changes on your products
- Obtain supplier declarations, interpret supplier responses, manage supplier documentation and identify products containing Prop 65 ingredients

GLOBAL CHEMICAL REGISTRATION, NOTIFICATION AND REPORTING

Do you require assistance with strategic global registration for production and distribution of chemical substances in specific markets? Verisk 3E can support new chemical notification, chemical registration and reporting using a cost effective, multilevel support approach tailored to fit your needs.

We can analyze and explain your registration obligations and recommend which substances to register and when. We can work with you to determine a new chemical's regulatory status, devise a clearance plan and implement the plan.

Verisk 3E can help you comply with Registration, Evaluation and Authorization of Chemicals (REACH). We are able to work collaboratively with you to submit and collect data for registration, including the identification of substances to determine possible authorization requirements. We can act as a third party representative in certain jurisdictions or refer you to a partner to serve as an Only Representative.

Our expert team can assist with product registrations in all European countries, in countries both within and outside of the EU and with and without a national product register. We can also manage the complexities of differing national poison centre reporting requirements under the Classification, Labeling and Packaging (CLP) regulation for you.

Contact Verisk 3E for comprehensive, intelligent strategies for compliance with regulations including:

- Globally Harmonized System of Classification and Labeling of Chemicals (GHS)
- EU REACH
- Korea (K) REACH
- New chemical notification/registration requirements emerging in countries including China, Japan, Australia, Philippines and Taiwan
- Conflict minerals reporting
- Emergency Planning and Community Right-to-Know Act (EPCRA)
- Resource Conservation and Recovery Act (RCRA)
- Emerging nano particle registrations

TSCA Compliance

Verisk 3E provides customized support for the complex and time consuming requirements of the Toxic Substances Control Act (TSCA) including its Chemical Data Reporting (CDR) Rule. Many companies do not employ TSCA specialists experienced in all aspects of the statute. Many more do not have personnel dedicated to the TSCA tasks and functions that cover raw materials, intermediates and finished products and require daily effort.

Verisk 3E fields a team of TSCA specialists trained, qualified and prepared to provide support for all aspects of TSCA compliance, from R&D to recycle and disposal. Outsourcing this process to well informed, actively involved, engaged and experienced regulatory professionals can be a highly efficient and effective way to address the challenges associated with TSCA compliance.

We offer many services to help you comply including the analysis and preparation of electronic reporting submissions, import/export clearances, Premanufacture Notices (PMN) and Low Volume Exemptions (LVE). We can help you seek, claim, report and manage applicable exemptions and exclusions. We can also develop EPA audit protocols and readiness programs, interact with the EPA on your behalf and create and conduct general awareness and function-specific training.

3E EU Poison Centre Notification

We offer a comprehensive set of EU Poison Centre Notification (PCN) solutions for compliance with both current and upcoming EU and national requirements under the CLP Regulation.

Services can be tailored to your needs including:

- Guidance in understanding PCN requirements and how they impact your company
- Obtaining and organizing the required data for notification including legal entity, packaging, distribution and product information (full composition, Mixture in Mixture)
- Unique Formula Identifier (UFI) strategy development and inclusion on SDSs and labels
- Preparation of product information in the required format and submission of the PCN dossier

SAFER CHEMICAL ANALYTICS

With increasing consumer and regulatory pressure to identify and replace harmful chemicals with safer and more eco-friendly alternatives, there is a growing need for chemical risk assessment and management as part of a comprehensive sustainability strategy. Verisk 3E offers intelligent hazard and risk assessment and management services that leverage our scientific expertise and regulatory knowledge base to provide in depth, actionable analysis of your chemical or product portfolio.

Verisk 3E is uniquely qualified to evaluate the relative hazards of chemicals or products. We can also recommend greener, yet functionally similar, chemicals to reduce health and environmental risks. Our board certified toxicologists can evaluate the toxicity of new chemicals and formulations, provide recommendations regarding classifications and labeling for intended markets, determine the risk resulting from particular chemical exposure conditions and more.

In response to the need for alternatives to animal testing in toxicological assessment, we offer predictive toxicology and interim techniques including Read-Across and Quantitative Structure Activity Relationships (QSAR) as well as laboratory test coordination and management. If you are faced with incomplete data sets, we can help you fill gaps through alternative toxicity methods in addition to recommending and coordinating actual testing. We can also help you interpret results.

We can identify chemical replacements, analyze the relative hazard/risk between alternative compounds and maintain a registry of health data for your products.

With 3E Green Score™, our innovative risk scoring methodology, we can evaluate a product or complex chemical mixture's health and environmental hazards taking into account workplace exposure scenarios. We can also perform intelligent risk assessments, evaluating product hazards based on SDS data and exposure considerations.

FACILITY EHS SERVICES

Verisk 3E experts can collaborate with you to develop comprehensive, cost effective solutions for EHS facility inspection, compliance plans, employee training and regulatory training. We can help you achieve preparedness for audits by regulatory agencies as well as customers seeking to affirm quality, compliance and certifications. We can provide training that ranges from general awareness to function-specific instruction and extends to every level of your organization.

Our facility EHS services can be customized to meet the needs of your individual sites as well as your overall business. With Verisk 3E you can proactively prepare for site and documentation inspections and establish protocols for compliance, quality assurance and continuous improvement.

TELL US WHAT YOU NEED

We can support a wide range of custom projects, developing comprehensive, flexible and scalable compliance programs that address your specific requirements. Our Regulatory Consulting Services team stands ready to help.

Choose Verisk 3E
