

3E Hazardous Waste Services

Streamlined management of waste compliance obligations

ONTIME

Services

3E Waste Management

3E Waste Management services are provided on an as-needed basis or by establishing a regular schedule. 3E handles thousands of hazardous waste projects each year, including hundreds of projects resulting from emergency response activities. 3E negotiates the best possible contract with a single pre-qualified hauler for pickups on pre-arranged dates. 3E coordinates the entire process, including the waste pickup, transportation, disposal of at a designated TSDf and reports to appropriate federal or state agencies.

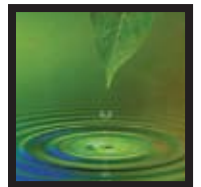

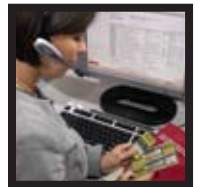

On an as-needed basis, customers are given step-by-step assistance with identifying and classifying their waste and proper temporary waste storage on-site. 3E tenders bids from pre-qualified contractors for each hazardous waste pickup. The bids are reviewed and the project awarded to the contractor based on capabilities and cost. 3E also scans and tracks waste disposal documentation forms such as manifests and bills of lading related to a customer's project in 3E's waste tracking database for reference and reporting purposes.

3E Waste Classification

3E's Waste Classification service provides assistance with the identification and classification of items that may be regulated as hazardous waste at the federal and state-specific level. 3E's solution streamlines and takes the guesswork out of the process of identifying and classifying hazardous waste.

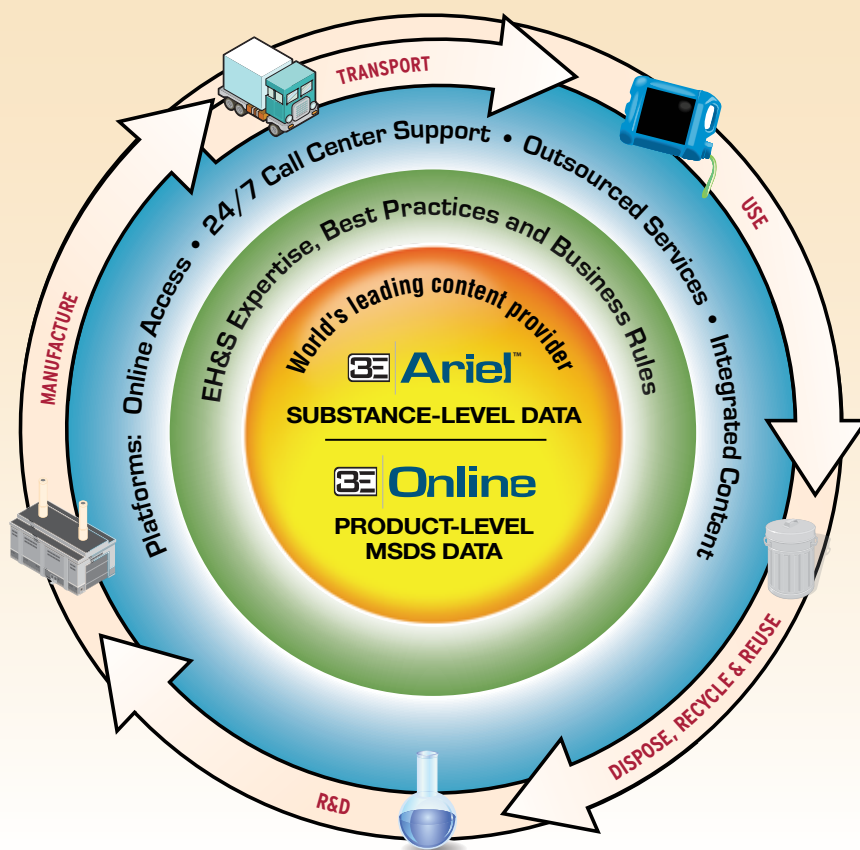

One of the critical components of a successful hazardous waste management program is accurately and consistently identifying and classifying items regulated as hazardous waste should they require disposal. Once the hazardous waste items have been identified, processes can be put in place to help ensure the proper handling, storage and disposal of these materials. Based upon the customer's chemical inventory, 3E provides waste classification data and information through a comprehensive review of the manufacturer Material Safety Data Sheets (MSDSs) and a meticulous process of determining the appropriate federal and state-specific waste codes and descriptions for a customer's products should they become hazardous waste. 3E's classification includes review of both listed and characteristic classification criteria on a Federal level, as well as for all 50 States across the U.S.

3E's waste classification data can be supplied in the form of customer report, data file or data feed of classification information directly into a customer's corporate system, enabling the customer to reduce data management costs by providing a centralized repository for classification data to be shared with the entire enterprise. 3E maintains data provided by monitoring for changes to hazardous waste regulations or manufacturersupplied MSDSs and providing updates on an on-going basis.

Full Chemical Lifecycle Management

3E Company's comprehensive suite of data products and information services enables improved compliance with global Environmental Health & Safety (EH&S) requirements related to the safe manufacturing, distribution, transportation, usage and disposal of chemicals and hazardous products. Whether you are a manufacturer, distributor, transporter, retailer or corporate user of chemicals or hazardous products, 3E can deliver a program specific to the EH&S compliance information and management needs of your organization that provides benefits to the entire enterprise and throughout the supply chain. 3E Company's full product lifecycle and supply chain approach provides a single, integrated solution for managing EH&S capabilities, resulting in reduced cost, risk and liability while improving business and compliance processes.

EH&S Challenges

With the spotlight shining brightly on EH&S compliance, companies are challenged with finding effective ways to address the complexities and intricacies of EH&S compliance management. Not only do these challenges stem from a constantly-changing regulatory landscape, but also from a scarcity of newcomers to the EH&S field, and pressure on EH&S departments to manage increased responsibility with fewer resources. Addressing these issues requires broad and deep domain expertise—expertise that doesn't always exist within the company. And if it does, this expertise is probably best utilized driving the company's overall compliance strategy, not bogged down with paperwork or the administrative burdens associated with maintaining compliance.

EH&S Solutions

At 3E Company, we understand the business and the burden of EH&S information and compliance management. 3E Company is a comprehensive, one-stop solution for content, tools and services for companies that want to take effective leadership and control of their product stewardship and EH&S compliance activities. 3E's products and services help companies make the transition from simply managing for compliance, to cutting-edge product stewardship practices that deliver tangible and sustainable business results.
